DECADE in the European Union Innovation Radar

Decade project has been selected for the Innovation Radar Platform, a European Commission initiative to identify high-potential innovations and innovators in EU-funded research and innovation projects. Thanks to the Innovation Radar platform, high-quality projects are visible and accessible to the public audience, informing incubators, entrepreneurs, funding agencies, and investors that can help get EU-funded innovations faster to market.

Moreover, the Innovation Radar platform recognized Decade project research contributes to the following United Nations Sustainable Development Goals(SDGs):

Sustainable Development Goal 7: Ensure access to affordable, reliable, sustainable, and modern *energy for all*.

The UN explains: "Energy is central to nearly every major challenge and opportunity the world faces today. Be it for jobs, security, climate change, food production, or increasing incomes, access to energy for all is essential. Transitioning the global economy towards clean and sustainable sources of energy is one of our greatest challenges in the coming decades. Sustainable energy is an opportunity – it transforms lives, economies, and the planet."

Sustainable Development Goal 9: Build resilient infrastructure, promote *inclusive and sustainable industrialization, and foster innovation*.

The UN explains: "Investments in infrastructure – transport, irrigation, energy, and information and communication technology – are crucial to achieving sustainable development and empowering communities in many countries. It has long been recognized that growth in productivity and incomes, and improvements in health and education outcomes require investment in infrastructure."

Sustainable Development Goal 12: Ensure *sustainable consumption and production* patterns.

The UN explains: "Sustainable consumption and production is about promoting resource and energy efficiency, sustainable infrastructure, and providing access to basic services, green and decent jobs and a better quality of life for all. Its implementation helps to achieve overall development plans, reduce future economic, environmental and social costs, strengthen economic competitiveness and reduce poverty.
